

STOCHASTISCHE MODELLE

ZUVERLÄSSIGKEIT, QUALITÄT UND SICHERHEIT

The **SOCIETY OF RELIABILITY, QUALITY AND SAFETY**, founded in 1998, is concerned with fostering the development of stochastics and its application in fields like manufacturing, communication, finance, survival analysis, and others with focus on various aspects of reliability, quality and safety.

Another aim is to bring together practitioners with background in engineering, natural sciences, economics, medicine and other sciences with academic researchers in stochastics for exchanging experiences and ideas of common interests and for discussing and introducing recent advances in stochastics.

In each year with even date the society meets at the biennial conference "Stochastik-Tage" organized by the *Special Interest Group for Probability & Statistics* of the Deutsche Mathematiker Vereinigung (DMV). In the years with odd date the society organizes a workshop on the state of the art in stochastic modelling and stochastic procedures.

If you are interested in the work of the Society of Reliability, Quality and Safety please contact one of the speakers:

- Prof. Dr. Uwe Jensen
(jensen@uni-hohenheim.de)
- Prof. Dr. Waltraud Kahle
(waltraud.kahle@mathematik.uni-magdeburg.de)
- Prof. Dr. Wolfgang Schmid
(schmid@euv-frankfurt-o.de)
- Prof. Dr. Henrik Schnegas
(h.schnegas@mb.hs-wismar.de)
- Prof. Dr. Ansgar Steland
(steland@stochastik.rwth-aachen.de)
